Computer Components and Build Assignment

Name(s):__Shoaib Mahmood, Lucas Ha, Victor Wang_____

Details:
You and your group are responsible for creating a google slide presentation titled “Computer Parts” where each slide will contain a cell phone image of a computer part found in your computer or in the class. You can not use an image from the internet. Each part must be isolated from any other part. For example, when taking an image of a CPU, you must make sure that it is not in the MB socket. All pictures are to be taken on a classroom table as the background. Highlight parts if they are on the motherboard using an image editor.

All of the parts you will photograph will come from this classroom. Ask your teacher if you are not sure where to look. Use the internet and google the part first so you have an idea of what to look for.

Below is a list of all the parts you need to have in your slide show. They must be in the order of the list. Each slide should have a number corresponding to the number in the list. Below the number should be the name of the part. Below that is a short paragraph describing the part/image and its role in the operation of the computer.

The parts you should find include the following:

1. CPU
2. CPU Socket
3. CPU Heat Sink and Fan Combo
4. CPU Notches and Triangles Markings used for proper insertion into the socket
5. CPU in socket
6. CPU in socket with heat sink and fan over it
7. RAM Module/Stick
8. RAM Slot
9. RAM Notches on RAM modules and slots used for proper insertion
10. RAM inside slot
11. Heat Sink 1
12. Heat Sink 2
13. PCI Slot
14. PCIe Slot
15. AGP Slot
16. 2.5” HDD
17. 3.5” HDD
18. ODD
19. SATA data cable
20. SATA Power cable
21. SATA MB header
22. 20/24 pin ATX MB header
23. 4/8 pin ATX MB header
24. 20/24 pin ATX power connector
25. PSU
26. MB standoff holes
27. Fan Power Connector
28. Fan MB header
29. CMOS battery
30. CMOS battery in CMOS battery holder

31. Front Panel IO header
32. Front Panel IO connectors
33. Front Panel IO Connectors in Front Panel IO headers
34. Video Card
35. Audio Card
36. Video Card PCIe Power header
37. Video/Audio Card mounted into the proper expansion slot
38. Bare Motherboard (no CPU,RAM, expansion card, CMOS battery)
39. Empty/Bare Computer Case (no MB, HDD,ODD,PSU)
40. Connector and header with highlights identifying the key in each one that allows for proper insertion. Include at least two pairs. Explain what a key is and how it prevents someone from accidentally connecting incompatible parts.

Marking Scheme:

K-40 You provide an accurate and clear description of each part

TI-40 You properly identified all components.

C-10 Your presentation is organized and presented in a professional manner

A-10-All images are clear and focused with highlighted parts if necessary and all assignment requirements are met
