Objective:

To research the history of computer programming and the different languages available today and their uses.

Details:

Create a slideshow presentation that covers the following topics:

Slide	Topic
1	Title
2	Intro to the topics to be covered
3	History of Programming
4	History of Programming
5	History of Programming
6	High Level vs Low Level Languages
7	Compiled vs Interpreted Languages
8	Assembly Programming
9	FORTRAN
10	COBOL
11	PASCAL
12	Object Oriented Programming with C++, Java
13	Python
14	Javascript
15	The Future of Programming as it relates to AI
16	Summary of the past, present and future of programming
17	List of links used as references

For each language, discuss when it was developed, by whom, its purpose and embed some sample code. Explain how to declare a variable, get inputs, make decisions etc. in the language and contrast it with how we do this in Javascript.

In regards to AI and programming list at least 3 tools that are available to help you use AI in programming.

This is a slideshow so be sure to make it creative and put effort into how it's designed/layed out/presented. Use images wherever possible.

Marking Scheme

KU /20
-content, materials, facts, data

APP /20
-follow all requirements

C /20
-spelling and grammar, presentation and design
